PetroApp®

1. Purpose:

To establish a standardized scheme for calculating and issuing bonus payout for KSA customer success team providing frequent bonus rewards upon team's achievement in the specified OKRs.

2. Scope:

This policy applies to Customer Success team in KSA

3. Definitions:

Vehicle renewal: Subscription renewal for a vehicle that is already subscribed to one of PetroApp plans.

Churn / Downgrade: Vehicle that is not renewed before the expiry of an active subscription.

Achievement Percentage: Is the percentage of planned renewals pool per month for monthly and annual subscriptions.

Note: Please see **Special Consideration** section to view special scenarios handling.

4. Bonus Scheme Calculation

Achievement	Bonus in Basic Salary / Quarter	(Basic Salary / Year)
91%-93%	1	4
93%+: 95%	1.25	5
95%+	1.5	6

- The proposed bonus scheme aims to provide quarterly rewards towards the accumulative achievement of each quarter and payout will be made on quarterly basis.
    - *Achievement is calculated **individually** for **Sr/Jr Customer Success Officer** while from Team Leader layer and above it is collective achievement based on their scope.*
- The scheme is designed to reward team members with all layers fairly with an **equal % of their salary** based on the achievements within their scope.
    - Each team member is accountable for their achievement according to their level, resulting into some members being eligible for bonus while others may not, due to missing to achieve their assigned target.
    - **Customer Success TL & Head of Customer Experience** layers' eligibility is dependent on the overall achievement of the team.
    - The scheme is valid until the end of 2025 or the hiring of Customer Success section head whichever is sooner.

5. Special Scenarios / Considerations

5.1 Early & Multiple Months Renewals: Renewals processed before the expiration date count towards the target of the month in which they are renewed.

5.1.1 *Example: If a client processes three separate monthly renewals in July, all three count towards July's target..*

5.2 Seasonal Accounts: If an account joins on monthly subscription then fully doesn't renew subscription due to seasonal reasons, The churned vehicles are not added to Customer Success team target.

5.3 Late Renewals:

5.3.1 Renewals made within 90 days of subscription expiry count for the month they occur.

5.3.1.1 *Example: If a client's subscription expired in Q2 and renewal happened in Q3, - After the 15 days cutoff date - renewal is counted towards Q3 while Q2 churn target had already been impacted (No retrospective update to Q2 achievement).*

5.3.2 Renewals made after 90 days of expiry require case-by-case validation.

5.4 **Target Dynamicity**: In case of switching plan from annual to monthly or vice versa, the following month's targets will fluctuate positively or negative.

5.5 In case a client upgrades their number of vehicles in **annual packages**, then downgrades later, case-by-case validation to happen in alignment with Finance Team & Customer Success team management

5.5.1 Example: Whichever calculated as an addition with Sales team, will not be calculated as an achievement to customer success and vice versa.

5.6 In case a client upgrades their number of vehicles as **monthly subscription**, the added vehicles will be counted in customer success's team target after the first renewal.

5.7 **End-of-Quarter Grace Period**: For renewal targets due at the very end of a quarter, a 15-day grace period into the next quarter is allowed to finalize the churn list.
